Corporate Finance - S R Vishwanath

2007-03-07

This—revised and enhanced—book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.

The New Entrepreneurial Leader - Danna Greenberg 2011-09-06

In years past, the keywords for leaders were confidence, single-minded purpose, and strategic planning. But today's vastly complex,

globalized, and fast-evolving world requires a different kind of leadership. This game-changing book details a new approach—entrepreneurial leadership—developed at Babson College, the number-one school for entrepreneurship in the world. Entrepreneurial leadership is inspired by, but is separate from, entrepreneurship. It can be applied in any organizational situation, not just start-ups. Based on two years of extensive research, it embraces three principles that add up to a fundamentally new worldview of business and a new logic of decision making. First, rapid change and increasing uncertainty require leaders to be “cognitively ambidextrous,” able to shift between traditional “prediction logic” (choosing actions based on analysis) and “creation logic” (taking action despite considerable unknowns). Guiding this different way of thinking and acting is a new view of business, where simultaneous creation of social, environmental, and economic value is the order of the day. Finally, entrepreneurial leaders leverage their understanding of themselves and their social context to guide effective action. Each chapter offers concrete examples of how educators across all disciplines are integrating these ideas into their courses—and even their entire curricula. The *New Entrepreneurial Leader* lays out a comprehensive new paradigm for reinventing management education in order to mold leaders who will shape social and economic opportunity.

Rotman on Design - Roger L. Martin

2013-01-01

Over the past decade, the Rotman School of Management and its award-winning publication, Rotman magazine, have proved to be leaders in the emerging field of design thinking. Employing methods and strategies from the design world to approach business challenges, design thinking can be embraced at every level of an organization to help build innovative products and systems, and to enhance customer experiences. This collection features Rotman magazine's best articles on design thinking and business design. Insights are drawn from the people on the frontlines of bringing design into modern organizations, as well as from the leading academics who are teaching design thinking to a new generation of global leaders. Rotman on Design is divided into three sections, each of which features an all-new introduction by a prominent thought leader. The selections cover a variety of practical topics, focusing on why design methodologies are so important today and how they can be introduced into organizations that have never before considered design thinking. They also illustrate the particular skills that promote great design - whether it be of a new business plan, a user experience, a health care system, or an economic policy. Together, the articles in this collection will help managers to thrive and prepare for future challenges. Anyone who is interested in fostering creativity and innovation in their organization will benefit from this engaging book.

The Performance of Socially Responsible Investment Funds in Europe - Eva Maria Kreibohm 2016-11-30

Socially responsible investing (SRI) is an investment approach that combines investors' financial as well as nonfinancial goals in the security selection process. Technically, investors can engage in SRI either by directly investing in

companies that implement corporate social activities or by investing their money in SRI funds, which apply screening criteria to select securities. The screening process applied by the SRI funds has led to controversy among academics regarding whether the use of SRI screens in the security selection process influences the financial performance of the funds. The empirical study analyzes whether or not the screening process applied by such funds influences their financial performance. Previous research mostly has focused on analyzing the performance of SRI equity funds established in the United States. The study at hand not only includes SRI equity funds, but also SRI balanced and fixed income funds established in Europe, the biggest market for SRI globally. The study provides unexpected results that are not only of interest for investors, who want to get a better understanding of the effect on the financial performance of their portfolios in case SRI funds are added. The results are also relevant for SRI fund managers, who are interested in promoting their funds and attracting (new) investors, and for academics, whose research interests are e. g., located in the fields of SRI, fund portfolio performances and market efficiencies.
