Termination Shock - Neal Stephenson 2021-11-16
New York Times Bestseller
From Neal Stephenson—who coined the term “metaverse” in his 1992 novel *Snow Crash*—comes a sweeping, prescient new thriller that transports readers to a near-future world in which the greenhouse effect has inexorably resulted in a whirling-dervish troposphere of superstorms, rising sea levels, global flooding, merciless heat waves, and virulent, deadly pandemics. “Stephenson is one of speculative fiction’s most

meticulous architects. . . . Termination Shock manages to pull off a rare trick, at once wildly imaginative and grounded.” — New York Times Book Review One man—visionary billionaire restaurant chain magnate T. R. Schmidt, Ph.D.—has a Big Idea for reversing global warming, a master plan perhaps best described as “elemental.” But will it work? And just as important, what are the consequences for the planet and all of humanity should it be applied? Ranging from the Texas heartland to the Dutch

royal palace in the Hague, from the snow-capped peaks of the Himalayas to the sunbaked Chihuahuan Desert, Termination Shock brings together a disparate group of characters from different cultures and continents who grapple with the real-life repercussions of global warming. Ultimately, it asks the question: Might the cure be worse than the disease? Epic in scope while heartbreakingly human in perspective, Termination Shock sounds a clarion alarm, ponders potential solutions and dire risks, and wraps it all together in an exhilarating, witty, mind-expanding speculative adventure.

Revolutionary Wealth - Alvin Toffler 2007-06-12

Since the mid-1960s, Alvin and Heidi Toffler have predicted the far-reaching impact of emerging technological, economic, and social developments on our businesses, governments, families, and daily lives. In **REVOLUTIONARY WEALTH**, they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future. **REVOLUTIONARY**

WEALTH focuses on how wealth will be created—and who will get it—in the twenty-first century. As the knowledge-based economy (a reality the Tofflers predicted forty years ago) continues to replace the industrial-based economy, they argue, money is no longer the sole determinate of wealth. The Tofflers explain that we are becoming a nation of “prosumers,” consuming what we ourselves produce, and argue that we have all taken on “third jobs”—work we unwittingly do without pay for some of the biggest corporations in the country. Using fascinating examples from our daily lives, they illustrate how our everyday activities—from parenting and volunteering to blogging, painting our houses, and improving our diets—contribute to a non-monetary economy that is largely hidden from economists. Writing with the same insight and clarity that made their earlier books bestsellers, the Tofflers present fresh, groundbreaking new

shock proteins. The main focus is on the role of heat shock protein families from *Plasmodium falciparum*, their role in protein folding and in the development of malaria pathology. The functions of individual families of heat shock proteins from plasmodium species and their cooperation in functional networks is described. Subcellular and extracellular organelles such as the apicoplast and the Maurer's Clefts which are associated with plasmodium species, are discussed in detail. The role of heat shock proteins in the development and function of these organelles structures are highlighted. Although conceding that heat shock proteins may not be ideal antimalarial drug targets, prospects of targeting heat shock proteins in antimalarial drug discovery either directly and/or in combination therapies are explored.

Powershift - Alvin Toffler
2022-01-04
Alvin Toffler's Future Shock and The Third Wave are among

the most influential books of our time. Now, in Powershift, he brings to a climax the ideas set forth in his previous works to offer a stunning vision of the future that will change your life. In Powershift, Toffler argues that while headlines focus on shifts of power at the global level, equally significant shifts are taking place in the everyday world we all inhabit—the world of supermarkets and hospitals, banks and business offices, television and telephones, politics and personal life. The very nature of power is changing under our eyes. Powershift maps the “info-wars” of tomorrow and outlines a new system of wealth creation based on individualism, innovation, and information. As old political antagonisms fade, Toffler identifies where the next, far more important world division will arise—not between East and West or North and South, but between the “fast” and the “slow.” In Powershift, Alvin Toffler has formulated the deepest, most comprehensive

The Reality Check series makes just one assumption: that you're serious enough about your spiritual journey to investigate Christianity with an open mind. This isn't about

joining anyone's religious club—it's about being real with yourself and with the others in your group. Since no one has all the answers, there's plenty of room for discussion. After all, if there is any truth to the Bible's stories about Jesus, then one thing he'd welcome are questions and opinions that come from honest, earnest hearts. What do you think the future holds? Right now it looks pretty scary. And Bible prophecy hardly brightens the picture—not with its mind-boggling images of singing saints, ten-horned monsters, mystical numbers, and a lake of fire. What does it all mean?

Fortunately, it does mean something. A great deal. And while the Bible paints a grim future for a world bent on worshiping its own ways, it offers great hope for those whose hearts are set on God. *Future Shock* includes these sessions: Will Jesus Return This Year? · The Scroll Opener · After the Gavel Falls . . . · Ultimate Evil: The Antichrist, the Beast, and 666 · Happily Ever After? · Flight Training

decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization

combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

LaValle Copeland Cane V, the child who fell outta Colored People Time and into America, is a fugitive... He is also just a regular teenager coming up in a terrifying world. A slightly eccentric, flip-phone loving kid with analog tendencies and a sideline hustling sneakers, the boundaries of Copeland's life are demarcated from the jump by urban toxicity, an educational apparatus with confounding intentions, and a police state that has merged with media conglomerates--the highly-rated Insurgency Alert Desk that surveils and harasses his neighborhood in the name of anti-terrorism. Recruited by the nearby private school even as he and his folks face eviction, Copeland is doing his damndest to do right by himself, for himself. And yet the forces at play entrap him in a reality that chews up his past and obscures his future. Copeland's wry awareness of the absurd keeps life passable, as do his friends and their surprising array of survival skills. And yet in the aftermath of a protest rally against police

violence, everything changes, and Copeland finds himself caught in the flood of history. Set in East Oakland, California in a very near future, Keenan Norris's *The Confession of Copeland Cane* introduces us to a prescient and startlingly contemporary voice, one that exposes the true dangers of coming of age in America: miseducation, over-medication, radiation, and incarceration.

Future Shock 2.0 - Emilio Iodice 2014-07-17

This is a work of fiction-based on fact! It is a wakeup call. The events, the stories and human drama depicted in these pages may not happen in 2020, but they will happen in our lifetime if we continue on our current course. The world is moving toward an era where we will have lost control of our future. Environmental, political, economic and social upheavals

are drawing together to form a synergy of challenges that seem impossible to resolve. Using an innovative multimedia format, this book explains that even though we know the problems and solutions, we face a lack of wise, ethical, experienced, courageous and compassionate leadership able to confront what we must collectively deal with on this planet. Indeed, the future is not up to our established institutions, it's up to YOU! Don't just read this book—change the world!

The Global Age - Martin Albrow
2013-06-28

Many authors who discuss the idea of globalization see it as continuing pre-established paths of development of modern societies. Post-modernist writers, by contrast, have lost sight of the importance of historical narrative altogether. Martin Albrow argues that neither group is able to recognize the new era which stares us in the face. A history of the present needs an explicit epochal theory to understand the transition to the Global Age. When globality displaces modernity there is a general decentering of state, government, economy, culture, and community. Albrow calls for a recasting of the theory of

such institutions and the relations between them. He finds an open potential for society to recover its abiding significance in the face of the declining nation state. At the same time a new kind of citizenship is emerging. This important book will provoke both radicals and conservatives. Its scholarship ranges widely across the social sciences and humanities. It is bound to promote wide cross-disciplinary debate.
