*The Last Good Man* - Patience Swift 2008

A man has lived on his own beside a wild, unforgiving coastline for many years. His companions are the birds, the land and the sea. From a choice made long ago, he keeps himself separate from the world of people and he gains a fierce pleasure from his environment. His solitude is broken by his discovery, one early morning on the flat sands of low tide, of a child washed up on the beach, but still alive. This is a novel of redemption, the story of a man experiencing the world as though for the first time.

*Popular Music and Public Diplomacy* - Mario Dunkel 2019-03-31

In the early years of the Cold War, Western nations increasingly adopted strategies of public diplomacy involving popular music. While the diplomatic use of popular music was initially limited to such genres as jazz, the second half of the 20th century saw a growing presence of various popular genres in diplomatic contexts, including rock, pop, bluegrass, flamenco, funk, disco, and hip-hop, among others. This volume illuminates the interrelation of popular music and public diplomacy from a transnational and transdisciplinary angle. The contributions argue that, as popular music has been a crucial factor in international relations, its diplomatic use has substantially impacted the global musical landscape of the 20th and 21st centuries.

**Communication and Learning** - Paul Witt 2016-09-12

In this volume, leading scholars from the fields of communication, educational psychology, and international education address what is known about the strategic role of interpersonal communication in the teaching/learning process. Instruction often involves spoken communication that carries information from teacher to learner, and in these instances the teacher's skillful and strategic use of language has a measurable impact on learning outcomes. Thus, the cumulative findings of instructional communication research are instrumental in maximizing the efficiency and effectiveness of both teaching and learning. Major sections of this volume include: Historical and Theoretical Foundations Instructor Characteristics and Behaviors Student Characteristics and Outcomes Pedagogy and Classroom Management Teaching and Learning Communication Across the Life-span This handbook serves researchers, professors, and graduate students by surveying the collective findings of research and experience concerning the intentional activity of teaching and learning.

**Oxidizing and Reducing Agents** - Steven D. Burke 1999-07-09

Oxidizing and Reducing Agents S. D. Burke University of Wisconsin at Madison, USA R. L. Danheiser Massachusetts Institute of Technology, Cambridge, USA Recognising the critical need for bringing a handy reference work that deals with the most popular reagents in synthesis to the laboratory of practising organic chemists, the Editors of the acclaimed Encyclopedia of Reagents for Organic Synthesis (EROS) have selected the most important and useful reagents employed in contemporary organic synthesis. Handbook of Reagents for Organic Synthesis: Oxidizing and Reducing Agents, provides the synthetic chemist with a convenient compendium of information concentrating on the most important and frequently employed reagents for the oxidation and reduction of organic compounds, extracted and updated from EROS. The inclusion of a bibliography of reviews and monographs, a compilation of Organic Syntheses procedures with tested experimental details and references to oxidizing and reducing agents will ensure that this handbook is both comprehensive and convenient.

**Curriculum Landscapes and Trends** - Jan van den Akker 2013-06-29

Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often report about educational reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon curriculum problems. It also aims to contribute to the increased exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

*Smart Thinking* - Art Markman, PhD 2012-01-03

When you understand how the mind works, you can think smarter—and act smarter. Based on the precepts of cognitive science and drawing on a half century of interdisciplinary studies, Smart Thinking is the first book to reveal a three-part formula that distinguishes Smart Thinking from innate intelligence and shows how memory works, how to learn effectively, and how to use knowledge when you need to get things done. Beginning with defining the difference between Smart Thinking and innate or raw intelligence, cognitive psychologist Art Markman demonstrates how it is possible to learn Smart

Thinking that you can apply to the real world. This engaging and practical book introduces a three-part formula for Smart Thinking, which demonstrates how anyone can: • Develop Smart Habits • Acquire High-Quality Knowledge • Use High-Quality Knowledge when needed Smart Thinking explores each part of the Smart Thinking formula and provides: • An understanding of how the mind works and the means to replace self-limiting habits with those that foster Smart Thinking • Insights into how memory functions and how to improve the quality of what you learn • Ways to present new information effectively • Specific techniques for improving your understanding of how the world works • The ability to define and solve problems by finding the relevant knowledge from any area of expertise and applying it effectively Drawing on multiple research disciplines, including psychology, artificial intelligence, philosophy, neuroscience, learning sciences, linguistics, anthropology, sociology, and education, Markman provides insights into the functioning of the mind and synthesizes this understanding into practical tools and exercises that develop new skills and achieve personal goals. The book culminates in tips for creating a Culture of Smart to make everyone in an organization more effective.

### **Discussion and Lecture Method in**

**Chemistry** - Abubakar Nyamida 2020-07-22  
Research Paper (undergraduate) from the year 2020 in the subject Didactics - Chemistry, grade: 3.5, University of Jos, language: English, abstract: The main purpose of this study is to examine the effects of discussion and lecture method on senior secondary two students' performance and interest in chemistry in Jos North, Nigeria. Specifically, the study sets out to determine the effects of discussion and lecture methods on academic achievements in chemistry and on academic achievement of male and female students who are taught chemistry. Teaching and learning are important parts of the process of education which are aimed at the development of learners' understanding and skills with which to become useful citizens in society. Education involves the total efforts of

the community to raise its political, social and economic standard of living. The implication of this is the development of a nation which depends on largely the level of its scientific and technological literacy. Thus, the importance of chemistry as a subject cannot be underrated especially in Nigeria where the national income rests on petroleum and petrochemical industries.

Teaching and Learning in the Secondary School  
- Ann Shelton Mayes 2013-06-17

Research and writing on secondary education is often a specialised treatment of isolated themes. This reader draws together the most significant work of recent years across a whole range of themes to give students and new teachers an overview of some of the most important issues and challenges that faced secondary teachers in the 1990s. It looks at the central players - the children and the teachers - at the classrooms in which they work together; at the curriculum, both implicit and overt; and at the wider community and political context of secondary education. Divided into sections to allow easy access to material of interest, the book covers: \* learners \* teachers \* classrooms \* curriculum \* schools. Throughout, the reader addresses the crucial issues of effectiveness, quality and achievement and how these will influence the work of the secondary teacher in the coming years.

English Computer Corpora - Stig Johansson  
1991-01-01

The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses, and above all fresh approaches that contribute to the overall aim of the series, which is to further outstanding research in English linguistics.

Women of Owu - Femi Osofisan 2006

**Explicit Biology - A Revision Course (3rd Edition)** - O. J. Olaoye 2014-05-01

The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST -UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Sofola B.Sc, M.Sc, M.B.B.S (Lagos), Ph.D (Leeds), FAS (Nig.) Professor of physiology, College of Medicine, University of Lagos Former Vice Chancellor, OOU, Ago- Iwoye. Ogun State.

*Naked Soles* - Gbemisola Adeoti 2005

*Chemistry for Secondary Schools* - Ernest L. Dinsmore 1925

*Unexpected Joy at Dawn* - Alex Agyei-Agyiri 2003  
Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of

migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.
