This book introduces and
analyzes the models for
engineering leadership and
competency skills, as well as
frameworks for industry-
academia collaboration and is
appropriate for students,
researchers, and professionals
interested in continuous
professional development. The
authors look at the
organizational structures of
engineering education in
knowledge-based economies
and examine the role of
innovation and how it is
encouraged in schools. It also
provides a methodological
framework and toolkit for
investigating the needs of
engineering and technology
skills in national contexts. A
detailed empirical case study is
included that examines the
leadership competencies that
are needed in knowledge-based
economies and how one

university encourages these in
their program. The book
concludes with conceptual
modeling and proposals of
specific organizational
structures for implementation
in engineering schools, in order
to enable the development of
necessary skills for future
engineering graduates.
