Visualising Small Traumas - Pedro Moura
2022-02-28

Cultural history of contemporary Portuguese comics and their creative responses to trauma Portugal's vibrant comics scene originated as early as the 19th century, bringing forth brilliant individual artists, but has remained mostly unknown beyond Portugal's borders to this day. Now a new generation employs this medium to put into question hegemonic views on the economy, politics, and society. Following the experience of the financial crisis of the past decades and its impact on social policies, access to and rules of public discourse, and civil strife,

comics have questioned what constitutes a traumatogenic situation and what can act as a creative response. By looking at established graphic novels by Marco Mendes and Miguel Rocha, fanzine-level, and even experimental productions, *Visualising Small Traumas* is the first English-language book that addresses Portuguese contemporary comics and investigates how trauma studies can both shed a light on comics making and be informed by that very same practice. This publication is GPRC-labeled (Guaranteed Peer-Reviewed Content). Total Health - 2010

Handbook of Research on Digital Learning - Montebello, Matthew 2019-10-11

Education has gone through numerous radical changes as the digital era has transformed the way we as humans communicate, inform ourselves, purchase goods, and perform other mundane chores at home and at work. New and emerging pedagogies have enabled rapid

advancements, perhaps too rapidly. It's a challenge for instructors and researchers alike to remain up to date with educational developments and unlock the full potential that technology could have on this significant profession. The *Handbook of Research on Digital Learning* is an essential reference source that explores the different challenges and opportunities that the new and transformative pedagogies have enabled. The challenges will be portrayed through a number of case studies where learners have struggled, managed, and adapted digital technologies in their effort to progress educational goals. Opportunities are revealed and displayed in the form of new methodologies, institutions scenarios, and ongoing research that seeks to optimize the use of such a medium to assist the digital learner in the future of networked education. Featuring research on topics such as mobile learning, self-directed learning, and cultural considerations, this book is ideally designed for teachers,

principals, higher education faculty, deans, curriculum developers, instructional designers, educational software developers, IT specialists, students, researchers, and academicians.

[Awesome Autumn](#) - Bruce Goldstone 2012-08-07

Autumn is awesome! Leaves change color. Animals fly south or get ready to hibernate. People harvest crops and dress up as scary creatures for Halloween. And then there are pickup football games to play, Thanksgiving foods to eat, leaf piles to jump in—all the amazing things that happen as the air turns crisp and cool. With colorful photographs, lively explanations, and classic craft ideas, Bruce Goldstone has created a festive and fascinating exploration of autumn's awesomeness.

Organizing and Managing the Language Arts Block - Lesley Mandel Morrow 2003-01-01

This book offers essential guidance to preservice and inservice teachers seeking to create, revise, or add new strategies to the teaching of the language arts block. The focus is on how to

implement effective strategies in the context of a well-planned classroom and a smoothly choreographed daily schedule. In a series of vivid case studies, Lesley Mandel Morrow brings to life the methods used by exemplary teachers to create rich, student-friendly learning environments for children in grades K-4. No component of organizing the language arts block is omitted, including setting up and running classroom learning centers, assessing different instructional needs, conducting whole-class and small group meetings, and linking language arts to content area instruction. Enhancing the practical utility of the book are sample daily schedules and classroom management tips for each grade level, along with dozens of reproducible learning activities, lesson plans, and assessment and record-keeping tools.

Some Assembly Required - Neil Shubin
2021-08-31

An exciting and accessible new view of the evolution of human and animal life on Earth. From the author of national bestseller, *Your Inner Fish*, this extraordinary journey of discovery spans centuries, as explorers and scientists seek to understand the origins of life's immense diversity. "Fossils, DNA, scientists with a penchant for suits of armor—what's not to

love?"—BBC Wildlife Magazine Over billions of years, ancient fish evolved to walk on land, reptiles transformed into birds that fly, and apelike primates evolved into humans that walk on two legs, talk, and write. For more than a century, paleontologists have traveled the globe to find fossils that show how such changes have happened. We have now arrived at a remarkable moment—prehistoric fossils coupled with new DNA technology have given us the tools to answer some of the basic questions of our existence: How do big changes in evolution happen? Is our presence on Earth the product of mere chance? This new science reveals a multibillion-year evolutionary history filled with twists and turns, trial and error, accident and invention. In *Some Assembly Required*, Neil Shubin takes readers on a journey of discovery spanning centuries, as explorers and scientists seek to understand the origins of life's immense diversity.

Wellness expert Mallika Chopra speaks to a younger audience in this new picture book about feeling emotions in your body through color. Did you know that your body is absolutely amazing? It can do so many things at the same time, explore the world both inside and outside, and help you feel the feelings deep down inside. When you start to feel big feelings, it's helpful to use colors, words, and breath to explore your body and to make yourself calmer and more at peace. In wellness expert Mallika Chopra's debut picture book, she helps children imagine a rainbow of colors radiating from their body and combines this color connection with breathing exercises to help them relieve stress, tension, fears, and sadness and to feel happier and more at peace. *My Body Is a Rainbow*, adapted from her middle grade guidebook *Just Feel*, is sure to be a go-to resource for parents, caregivers, and educators to help preschool-aged children feel safe, creative, strong, loved, unique, wise, and

The Course Reflection Project - Nicole Schonemann 2015-05-01

Service-learning is entering a post-initiatory

phase. At tertiary institutions of all types and sizes, service-learning programs are common and service-learning requirements for graduation are growing in popularity. Taken together -- alongside continued faculty interest in effective teaching -- these factors have raised the visibility and popularity of service-learning. Now the greater need in service-learning is not to prove the need for, or efficacy of, service-learning, but to turn the focus squarely back on practice. Following established best practice is not enough; instructors also need to reflect on how this fits within the specific context and application of each unique course and service-learning partnership. While there are many excellent resources that detail best practice and showcase exemplary service-learning courses, faculty reflection and course revision often goes unmentioned. In response to the lack of attention on the role of reflection and course revision, we convened groups of faculty from a variety of disciplines to reflect deeply on their

courses, paying specific attention to obstacles and challenges. These conversations were converted to articles for this edited collection, each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts. This text contributes to the body of literature on service-learning in a unique and practical manner. Faculty teaching or interested in teaching service-learning classes would benefit from this text as well as university administrators and community service directors involved in service-learning at a programmatic and institutional level. This book should be marketed to faculty teaching disciplinary service-learning classes and service-learning pedagogy classes and administrative offices involved in service-learning. This could be a supplementary text for graduate-level pedagogy courses. Higher education institutional libraries would benefit from this text, as well as the national and state campus compact offices.

2020-03-11

Cut and Paste books for kids Awesome scissor cutting, gluing, coloring practice activity book for preschoolers, kindergarten, pre k, age 3-5 How to Teach a Child to Use Scissors Most children around age 2 or 3 are ready to begin using scissors. It's important for children to know how to be safe with scissors. Once they're

ready, using scissors can be an excellent way for the child to build fine motor skills and patience. Teaching How to Use Scissors 1.Let the child see you use a scissors. Show them how you do it, and let them watch. If they're curious, then you'll know they're most likely ready to learn. 2.Start with the grip. Show the child in your hand how to hold the scissors, and then have them try to copy it. If they aren't able to alone, help move their fingers and thumb into the right position. -Teach them that the thumb always goes in the hole. Draw an eyeball on the small thumb hole and explain that the eyeball will always be on top. -Teach them that two fingers in the larger hole. Help them put their index finger and their middle finger in the hole. 3.Try having the child do their best to cut in a line or other shapes. Try drawing lines or shapes for the child to cut. After they do it, praise them. (Keep in mind that they may not be very precise yet; they're still young.) This book will help to improve cutting skill for your kids 50 pages for

From Head to Toe Board Book - Eric Carle
1999-03-27

What does an elephant do? It stomps its foot. Can you? From the creator of such beloved classics as *The Grouchy Ladybug* and *The Mixed-Up Chameleon* comes this interactive story that invites kids to imitate animal movements. Watching giraffes bend their necks or monkeys wave their arms is fun, but nothing could be better than joining in. From their heads down to their toes, kids will be wriggling,

jiggling, and giggling as they try to keep up with these animals! Alligators wiggle, elephants stop, gorillas thump, and giraffes bend. Can you do it? 'I can do it!' is the confidence-building message of this fun-filled interactive picture book. A variety of familiar animals invite young children to copy their antics, and as they play, they will learn such important skills as careful listening, focusing attention, and following instructions. Just as alphabet books introduce the very young child to letters and simple words, *From Head to Toe* introduces the basic body parts and simple body movements. And in the same way that children progress from understanding simple words to reading and writing sentences and stories, so they will progress from simple body movements to dancing, gymnastics, and other sports and activities, with confidence and pleasure. Eric Carle's colorful collages have delighted children for more than a generation. Each book provides hours of fun while encouraging them to stretch their imaginations.

His matchless words and illustrations now send out a new challenge: Are you ready? Here we go! Move yourself From Head to Toe. A Main Selection of the Children's Book-of-the-Month Club

Multimodality across Communicative Settings, Discourse Domains and Genres -

Veronica Bonsignori 2017-01-06

This volume focuses on multimodality in various communicative settings, with special attention to how non-verbal elements reinforce and add meaning to verbal expressions. The first part of the book explores issues related to the use of multimodal resources in educational interactions and English language classroom teaching, also involving learners with disabilities. The second part, on the other hand, investigates

multimodality as a key component of communication that takes place in different specialized domains and genres. The book reflects a variety of methodological approaches that are grounded in both quantitative and qualitative techniques. These include multimodal discourse analysis, multimodal transcription, and multimodal annotation software capable of representing the interplay of different semiotic modes, such as speech, intonation, direction of gaze, facial expressions, gestures and spatial positioning of interlocutors. The research collected here highlights the increasingly important role of multimodality in communication across different genres and communicative contexts, and offers new perspectives on how to exploit multimodal resources to enhance the learning of English for both general and specific purposes.

Neither - Airlie Anderson 2018-03-06

In this colorful and touching story that celebrates what makes each of us unique, a little creature that's not quite a bird and not quite a bunny--it's "neither"--searches for a place to fit in. In the Land of This and That, there are only two kinds: blue bunnies and yellow birds. But one day a funny green egg hatches, and a little creature that's not quite a bird and not quite a

bunny pops out. It's neither! Neither tries hard to fit in, but its bird legs aren't good for jumping like the other bunnies, and its fluffy tail isn't good for flapping like the other birds. It sets out to find a new home and discovers a very different place, one with endless colors and shapes and creatures of all kinds. But when a blue bunny and a yellow bird with some hidden differences of their own arrive, it's up to Neither to decide if they are welcome in the Land of All. This colorful, simple, and touching story promotes diversity and offers a valuable lesson to the youngest of audiences: it is our differences that unite us.
