Aiming for Global Accounting Standards - Kees Camfferman 2015

The International Accounting Standards Board (IASB) and its International Financial Reporting Standards (IFRSs), have acquired a central position in the practice and regulation of financial reporting around the world. As a unique instance of a private-sector body setting standards with legal force in many jurisdictions, the IASB's rise to prominence has been accompanied by vivid political debates about its governance and accountability. Similarly, the IASB's often innovative attempts to change the face of financial reporting have made it the centre of numerous controversies. This book traces the history of the IASB from its foundation as successor to the International Accounting Standards Committee (IASC), and discusses its operation, changing membership and leadership, the development of its standards, and their reception in jurisdictions around the world. The book gives particular attention to the IASB's relationships with the European Union, the United States, and Japan, as well as to the impact of the financial crisis on the IASB's work. By its in-depth coverage of the history of the IASB, the book provides essential background information that will enrich the perspective of everyone who has to deal with IFRSs or the IASB at a technical or policy-making level.

Financial Access and Stability - The World Bank 2011-09-21

The countries of the Middle East and North Africa (MENA) have been recovering from the global financial crisis, but the recent political turmoil has interrupted the pace of credit and output recovery in many countries. The political turmoil in the MENA region reveals deep-seated frustrations and a sense of political, social, and economic exclusion, especially among the youth. The relatively weak growth

performance reflects a combination of insufficient reforms and weak reform implementation, including financial sector reforms. The structural weaknesses of financial sectors imply that access to finance may remain restricted even with a full recovery of credit activity. Therefore, the region's countries face an ambitious reform agenda to revert two decades of relatively poor performance of output and employment growth. Financial development should be a central component of the region's growth agenda. This study reviews the region's financial systems, the severity of the limitations on access to finance, and the main factors behind such limitations. It goes on to provide a road map for expanding access and preserving financial stability.

Неординарный лизинг - Виктор Газман 2019-05-18

Цель этой книги – вооружить читателя методами подготовки и реализации сложноструктурируемых инвестиционных лизинговых проектов. Она отражает преимущества нетрадиционных моделей лизинга, теоретические и методологические аспекты их формирования, определяет критерии целесообразности использования. Акцентируется внимание на левиредж-лизинге, аренде-продаже, возвратном лизинге, которые в ряде стран продемонстрировали высокую инвестиционную эффективность и могут быть полезны для мобилизации денежных средств, ресурсосбережения и привлечения капитала, в том числе иностранного, в отечественную экономику. Они позволяют расширить линейку инвестиционных продуктов. Рассмотрены сложные вопросы по использованию лизинга в проектном финансировании, в международном и межгосударственном лизинге, при купле-продаже лизинговых контрактов; представлены новые результаты исследований по секьюритизации как инструменту развития альтернативных моделей лизинга; данные о нетрадиционных для российского рынка гарантиях. Выясняются достоинства и недостатки каждой модели и схемы, определяется, насколько та или иная из них приемлема для эффективного использования в России. В книге содержится обширный статистический материал, собранный автором в течение многолетней исследовательской работы, приводится наиболее полная информация о лизинге в России за 1992–2013 гг., данные по более чем 600 лизингодателям в США, Германии, Великобритании, Италии, России. Пособие может использоваться при изучении студентами бакалавриата и магистратуры курсов «Финансовый лизинг и факторинг», «Финансовый менеджмент», «Банковское дело», «Корпоративные финансы», «Международный лизинг», «Лизинг в управлении ресурсами проекта». Книга также полезна для научных, практических целей работникам предприятий, банков, лизинговых компаний, формирующим стратегию развития, привлечение средств для финансирования инвестиционных проектов.

Contractual Management - Ralph Schuhmann 2019-10-24

The Concept Contractual Management offers a holistic approach to managerial decision-making based on contracts or business processes that are related to contracts. It explains management from the point of view of the contract, just as it interprets the contract from the point of view of management. Thus, the approach highlights the great inherent potential of contracts for managing companies, transactions and business relationships. The book addresses students as well as practitioners and gives insights into the usage of contracts to manage companies or relationships. It covers contract handling from preliminary deliberations to negotiations, implementation, and all the way to the evaluation of the contract within the company. Furthermore, it provides competencies to design and implement a contract and to organize the relevant processes. The Content In Part 1, the book explains the theoretical foundations of Contractual Management; in Part 2, the application of the approach is illustrated through case studies which cover various sectors, industries, company sizes, contract types, and management situations. Theory part: Contractual Management – A Holistic Approach to a Diverse Issue. Case study part: 11 case studies arranged according to specific contract-related topics: Information and Communication – Change – Enterprise Networks – Conflict – Accounting and Financing – Legal Compliance – Societal Steering. The Editors Professor Dr. Ralph Schuhmann: After holding a senior management position in industry, Ralph Schuhmann now teaches Business Law at Ernst-Abbe-Hochschule in Jena, Germany. He is the scientific director of the Contractual Management Institute at SRH Hochschule Berlin and has published various articles on contract law and contract management. Professor Dr. Bert Eichhorn: Before his appointment as professor for International Law and Business Law at SRH Hochschule Berlin, Bert Eichhorn worked as a legal consultant at the EU Parliament and as a lawyer. He has published numerous articles in national and international scientific journals in the area of contract management and international law. He is the managing director of the Contractual Management Institute at SRH Hochschule Berlin.

Financing Africa - Samuel Munzele Maimbo 2011-09-07

Financing Africa takes stock of Africa's financial systems in light of recent changes in the global financial system --including the greater risk aversion of international investors, a shift in economic and financial powers towards emerging markets and the regulatory reform debate - and the increasing role of technology. Using a wider and more detailed array of data than previous publications, we observe a trend

towards financial deepening, more stability and more inclusion leading up to the crisis; serious challenges, however, continue, including limited access to financial services, focus on short-term contracts and hidden fragility, related to weak regulatory frameworks, undue government interference and governance deficiencies. Our policy analysis therefore focuses on (i) expanding outreach, (ii) fostering long-term finance and (iii) improving regulation and supervision. We identify the positive role of innovation and competition, a stronger focus on non-traditional financial service providers, and more emphasis on demand-side constraints as priority areas for policy actions. Specifically, competition from new players outside the banking system, including telecomm companies can increase outreach with technological innovation that changes the economics of retail finance. Moving beyond national stock exchanges that are not sustainable in most African countries towards regional solutions and over-the-counter trades can help foster long-term finance, as can addressing governance challenges in contractual savings institutions, including life insurance companies and pension funds. Finally, there is a need to look beyond supply-side constraints towards users of financial services, focusing more on financial literacy of households and firms, but also consumer protection. In formulating policy messages, we carefully distinguish between different country groupings, differentiating -- among others -- between low- and middle-income and small and larger economies, with a special focus on resource-based economies and post-conflict countries. This book reaches out to both policy makers concerned about a more inclusive and effective financial system and other stakeholders, including practitioners and development partners. With this book we aim to contribute to the on-going financial sector debate on Africa, with the ultimate goal of faster economic development and poverty reduction.

Voitures de société et mobilité durable - Anneloes Vandebroucke 2019-04-29

Le point sur les voitures de société en Belgique, leurs usagers et leurs impacts. La voiture de société est, sans aucun doute, un des avantages de toute nature (ATN) les plus fréquemment proposés par les entreprises à leurs employés. Combien compte-t-on de voitures de société en Belgique ? Quels sont les profils des usagers ? Et quels sont les impacts sociétaux, environnementaux et économiques de cet « avantage ». Cet ouvrage, qui rassemble les travaux menés dans le cadre de la chaire « Companies and Sustainable Mobility. The Company Car Debate and Beyond » du Brussels Studies Institute (BSI), se penche sur ces questions et les dépasse en ouvrant le débat sur les alternatives possibles pour une mobilité plus durable. Un ouvrage de référence qui ouvre le débat sur les alternatives pour une mobilité plus durable, en rassemblant différents travaux réalisés dans le cadre de la chaire Companies and Sustainable Mobility. The Company Car Debate and Beyond EXTRAIT Dire que la mobilité est un des grands défis sociaux actuels, c'est enfoncer une porte ouverte. Des débats (parfois extrêmement intenses) sur divers aspects du défi de la mobilité ont régulièrement lieu dans les médias nationaux (et régionaux) et entre les partis concernés. La voiture de société, entre autres, est fréquemment abordée lors de telles discussions ces dernières années. En soi, cela n'a rien d'étonnant, compte tenu du nombre (environ 650.000 véhicules, soit 11 % du parc automobile total en mai 2016 ; May, 2017) et de l'importance de ces voitures de société (en termes d'économie, mais aussi de leur impact sur la mobilité, l'environnement, la fracture sociale...). Lors de ces débats règne un grand désaccord sur les concepts, sur les définitions et même, dans certains cas, sur les chiffres utilisés comme références (cf. chapitre 2). En outre, les discussions ne portent souvent que sur un seul aspect d'une problématique plus vaste et une approche plus globale, multidimensionnelle et multiperspective est rarement utilisée. En outre, d'autres domaines et réalités politiques (complémentaires) pertinents ne sont pas toujours pris en considération (Repko & Szostak, 2017 ; Rutting et al., 2014). Comme lors d'autres défis sociaux qui se manifestent dans les (grandes) villes et les régions densément peuplées, il s'agit donc d'une problématique complexe, de nature multidimensionnelle, qui comporte de très nombreuses composantes à différents niveaux et registres (tax shift global au sein de l'économie comme base à la compétitivité, rémunération individuelle, mobilité et politique industrielle, technologie, écologie et durabilité, aspects sociodémographiques tels que les schémas de déplacement pour le travail, l'école, les courses, les loisirs, le sport, etc., emploi du temps, mode de vie...) (cf. chapitre 13 pour quelques références à la littérature universitaire sur le sujet). Parallèlement, il est clair que ce thème ne peut être dissocié des clivages et questions politiques/sociales qui divisent divers groupes sociaux. L'utilisation de la voiture en général et de la voiture de société/voiture-salaire en particulier non seulement renvoie en effet à une logique individuelle, mais possède aussi une dimension sociale évidente, dans laquelle la culture, les mentalités, les identités et le mode de vie jouent également un rôle (cf. Demoli & Lannoy, 2019).

Project Financing: Financial Instruments And Risk Management - Carmel De Nahlik 2021-05-05

The book describes the different tools and techniques available to anyone who is engaged in providing funding or advice to a project. Project finance is ultimately about applying three basic principles to a funding situation and from these three, all the other ideas flow including contracts. First, there needs to be a cash flow coming from the project that is capable of being captured by finance providers. Second, there needs to be a group of assets that can be segregated and contained by making sure they cannot be taken away by other parties and thirdly there needs to be a risk envelope that is well understood and managed dynamically during the project's life. To do this, a network of contracts must exist to support the rights of the different stakeholders and their legal claims on the project. In this book the authors examine all of these aspects and provide some examples/mini-cases of project structures and approaches. The book begins and ends with a longer case study of two projects that were standalone examples of project financing and controversial for different reasons at the time of their fundraising.

Global Financial Stability Report, October 2016 - International Monetary Fund. Monetary and Capital

Markets Department 2016-10-05

The current report finds that short-term risks to global financial stability have abated since April 2016. The rise of commodity prices from their lows, along with the ongoing adjustments in emerging markets, has supported a recovery in capital flows. In advanced economies, weaker growth has been mitigated by the prospect of further monetary accommodation. Despite this decrease in short-term risk, the report finds that medium-term risks continue to build. The political climate is unsettled in many countries, making it more difficult to tackle legacy problems. Financial institutions in advanced economies face a number of structural and cyclical challenges. Corporate leverage in emerging markets remains high and would fall only gradually under the report's baseline scenario. Policymakers need a more potent and balanced policy mix to deliver a stronger path for growth and financial stability. There is an urgent need to raise global growth, strengthen the foundations of the global financial system, and bolster confidence. The report also examines how the rise of nonbank financing has altered the impact of monetary policy and finds that the fears of a decline in the effectiveness of monetary policy are unfounded. It appears that the transmission of monetary policy is in fact stronger in economies with larger nonbank financial sectors. Finally, the report examines the link between corporate governance, investor protection, and financial stability in emerging market economies. It finds that the improvements over the past two decades have helped bolster the resilience of their financial systems. These benefits strengthen the case for further reform.

Foundations of Airline Finance - Bijan Vasigh 2014-11-13

In recent years the airline industry has experienced severe volatility in earnings, with airlines recording periods of substantial profits that are closely followed by periods of financial distress. This trend has continued into the new millennium, with numerous examples of airlines across the globe entering bankruptcy protection or liquidating. The text provides an introduction to both the basics of finance and the particular intricacies of airline finance where there can be significant fluctuations in both revenues and costs. This new edition also includes: capital budgeting management of current assets financial risk analysis fuel hedging aircraft leasing This textbook contains chapters that cover unique aspects of the aviation financial decision-making process. These include a rigorous and structured presentation of the buy versus lease decision that is prevalent in the industry, a valuation process for aviation assets, the recent trend toward privatization and the difficulty inherent in the valuation of a publicly-owned or semi-publicly owned asset. The Foundations of Airline Finance, now in its second edition, is an introductory text that can

be used either as a general financial text or in a specialized class that deals with aviation finance in particular.

Business Report. Global Aircraft Manufacturing Industry - Stefan Lacher 2004-06-06

Seminar paper from the year 2004 in the subject Business economics - Business Management, Corporate Governance, grade: Distinction, Deakin University (Faculty of Business and Law), course: Strategic Management, language: English, abstract: The purpose of this report is to analyse the attractiveness of the aircraft manufacturing industry. Research for this report includes information from journal articles, newspapers, and analysis of actions of the main competitors. The major findings indicated that the aircraft manufacturing industry has undergone extensive changes since the late 1990's. Despite the negative effects of environmental change like the terrorism acts of September 11, 2001 and diseases like SARS on air travel, the aircraft industry is still attractive for new entrants. The long-term growth rate caused by globalisation, governmental support, and general need for more mobility show that there is still a large demand for aircrafts of all sizes. Due to the industry's attractiveness, it is highly recommendable to enter the industry. Companies considering this should be aware of the high volatility in the market as well as the huge capital investments needed for the development process. [...]
